

Hello,

The 1201 Fort proposal goes to the Committee Of The Whole.

The only good thing I can say for 1201 Fort/Pemtrelew proposal is that it could be even worse.

As Zebra Design justly says in the letter to the Council, the neighbourhood is unique and varied.

And yet, this development proposal has style, height, feel, appearance and massing of many commonplace developments, that are cold, monochrome, sterile and look alike.

To me it is just another development that has no character .

It seems that this proposal aims to please investors and the reactive attitude of municipal government, rather than become an organic part of our neighbourhood.

My impression is that this proposal is deprived of a vision, creative power, that can bring together the need for densification and lasting beauty for generations to come.

This is an iconic property because it is much loved by everybody in vicinity, not iconic by self proclamation.

It deserves a vision and creative power of somebody who would love it as much as we do, and who has a prudence of excepting less profit, and enjoying a gratitude of citizens.

Respectfully

Anna Cal
